

Kuwait Paper Company Turns to ENEFLOW to Control Their Mineral Scale Problems

ENECON's Distributors in Kuwait, have been expanding their ENEFLOW installations throughout their market.

These photographs illustrate a very successful application at a paper company which has installed ENEFLOW Power Cells on their main incoming water line to their factory and also on their boiler water feed lines.

“Results speak for themselves; within three weeks after the installation of the ENEFLOW 5000's, the in-line water flow meter -- which was scaled up and out of order for years -- started working!”
